

IDENTIFY MOBILE

IDENTIFICATION

EASY

LIKE A SELFIE

Identify is a platform for getting the identities of customer/users/citizens in an easy, convenient, cost-effective and secure way. **Easy**, because you just need a smartphone with a good camera. **Convenient**, because you do not need appointments with an operator, the process of identification and verification is decoupled. **Cost-effective**, because those in charge of processing the data in the company do not waste time with the users. **Secure**, because integrity and authenticity of data are protected with the best cryptographic technology available on the market.

MOBILE IDENTIFICATION FAST AND SECURE

No limits of time and space.

IDENTIFY
Mobile

powered by **Intesi Group**
www.intesigroup.com

Identify is a platform developed by Intesi Group equipped with a free App for self-identification. The App is also available ad SDK.

Identify is based on self-identification with selfie technique that is able to overcome the problems and limitations of traditional identification procedures.

BENEFITS FOR THE USER

- It does not require an appointment between the parties
 - It is independent from time zones
 - No need to move for the user or operator
- It does not require special device configurations
- Freedom of the user in managing the duration of the identification process
- No language barrier
- Independent from speed and latency of the lines

BENEFITS FOR THE COMPANY

- No need to move the operator
- Canceling the downtime (costs) of operators who have to manage the downstream process of self-identification
- Guaranteeing the quality of the collected data
- Possibility to minimize the risk of falsification
- SDK for an easy integration into existing Apps
