

Token migration via IG YOU App - Android

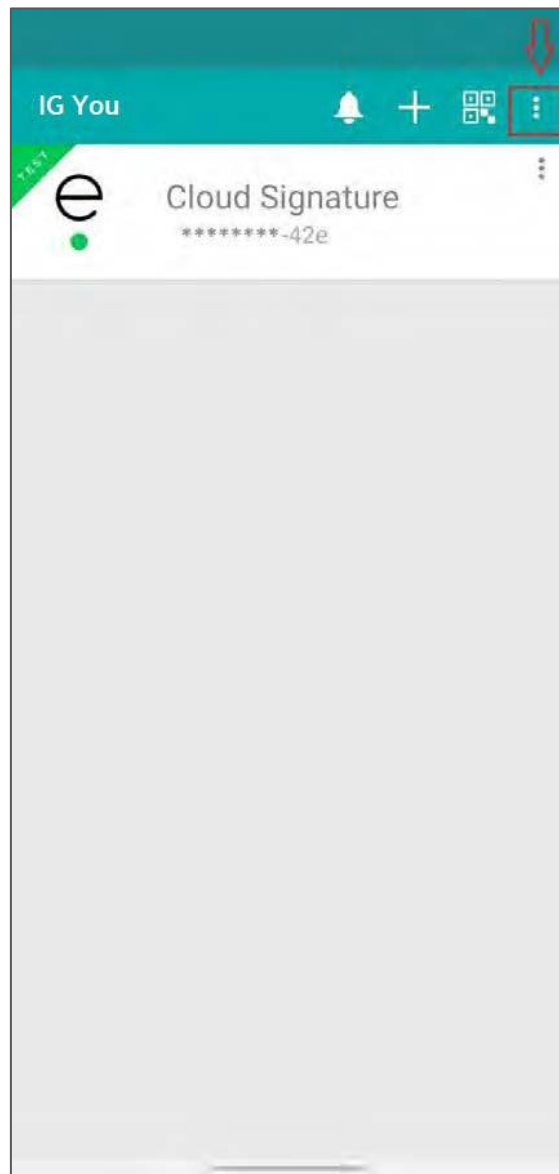

User guide

January 2025

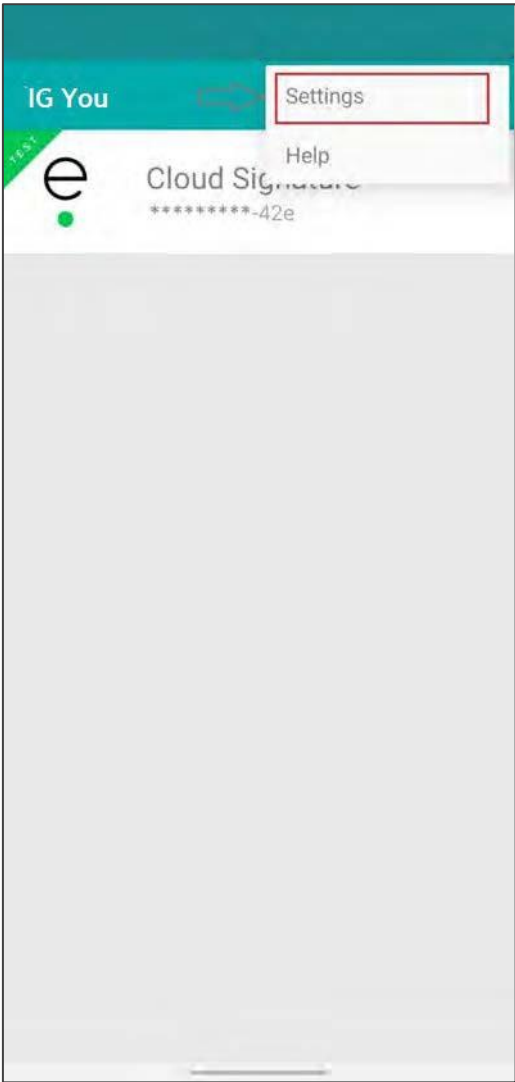

Token migration procedure via IG YOU App

To migrate your tokens from the old device to the new one, follow these steps:

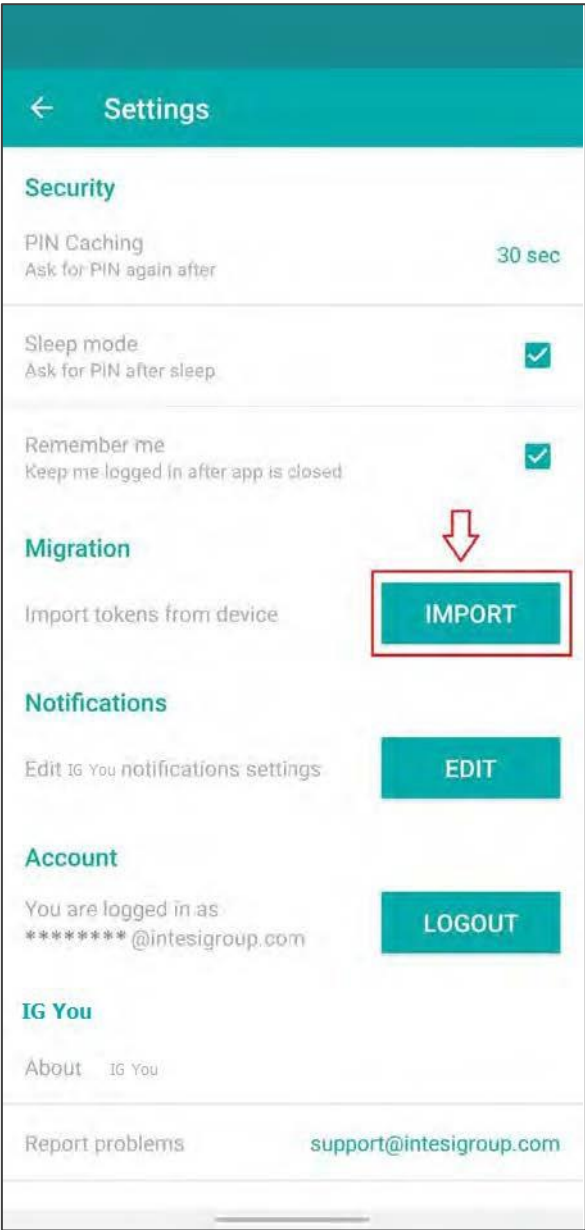

1. First, download and open the mobile app IG YOU on your new device.
2. Click on the three vertical dots located at the top right corner of the app interface

Select "Settings" in the pop-up menu:

In the Settings page, select "Import" under the "Migration" tab :

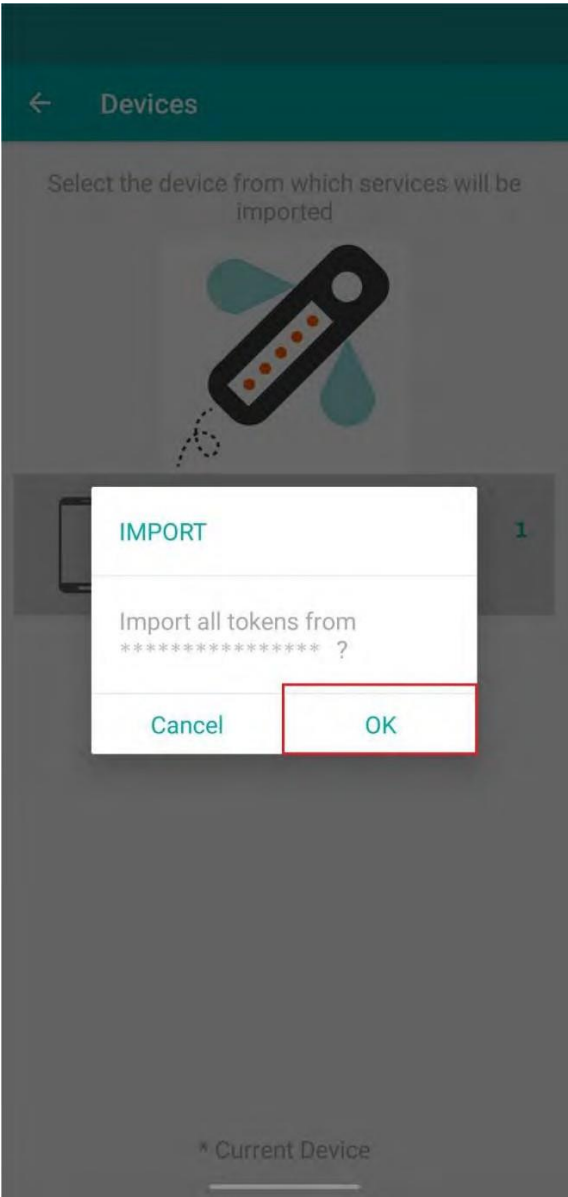

A new page opens, displaying your old device.

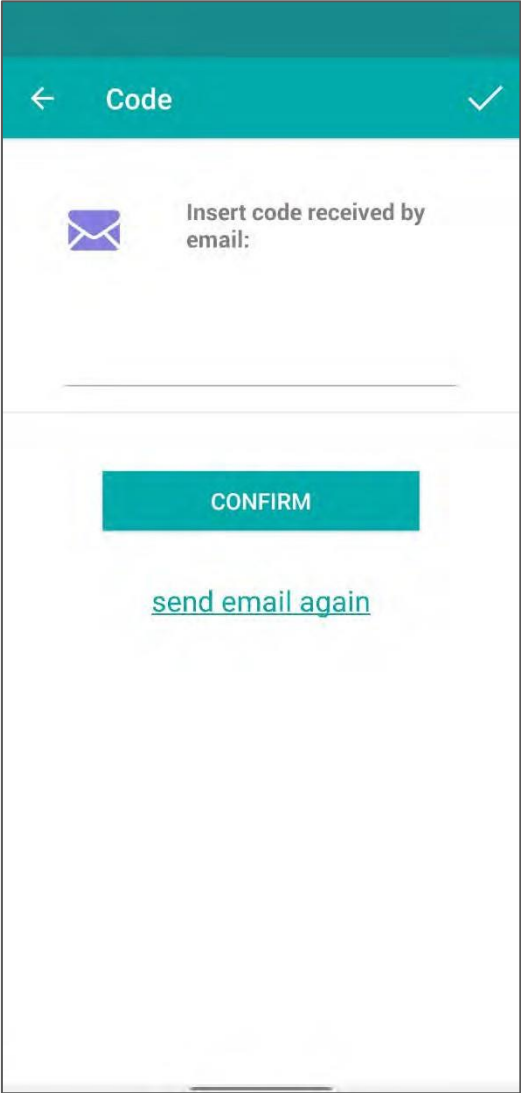

Click on it to migrate the certificates to your new device:

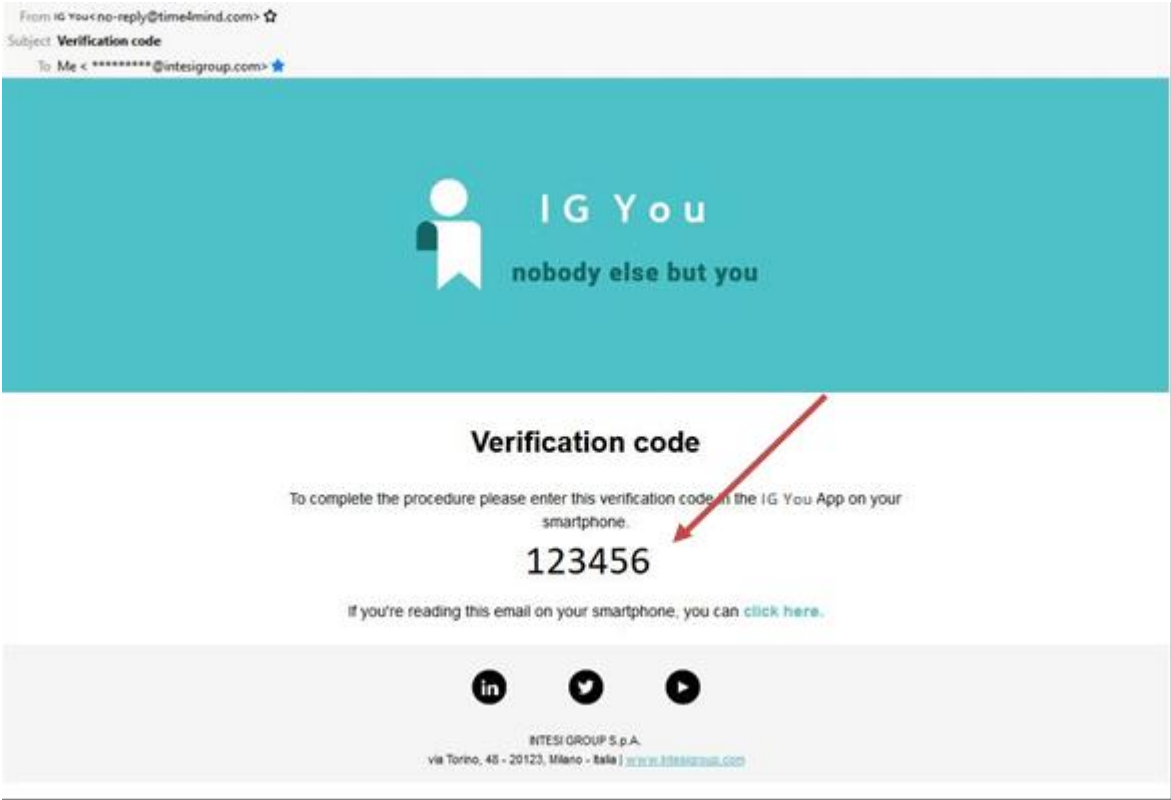

In the open pop-up, click on the "OK" button to start the migration:

By selecting "OK" you will be prompted to enter the OTP code received via email to complete the procedure:

The OTP code received in the email below must be entered into the App:

Once the OTP is entered, the tokens on the device will be reloaded in the App:
