

# VALID SIGN

---

# SIGN AND APPROVE DOCUMENTS FROM ANY DEVICE

---

Valid Sign is the most **innovative solution** for signature and document approval processes. The application is designed to meet a wide range of needs from the signature of a single file to the creation of more complex workflows.

It is the ideal solution for **authorization and onboarding processes** which involve documents that need to be approved or signed by several actors.

## **MAKE AUTHORIZATION PROCESSES FASTER!**

Sign and approve anywhere and with any device.

**SIGN AND APPROVE  
DOCUMENTS FROM ANY DEVICE**

## **FASTER AUTHORIZATION PROCESSES**

Authorization and onboarding processes often require the signing of a number of paper documents, with a big waste of time, money and space. With Valid Sign everything is easier: this **innovative solution** allows you to approve and sign documents, digitally and **from your smartphone**, wherever you are.

## **WE MANAGE YOUR PROCESSES**

With Valid Sign you can design the approval and signature processes (even the most complex!) with your browser. A step by step workflow composition with an **easy and intuitive design**: create a new file, upload the documents and invite your colleagues to approve and sign, in accordance with your organization's procedures.

## **PLUG AND PLAY**

Valid Sign is **cloud, scalable and cost effective**: you can get it immediately with no integration costs and waste of time! The free service includes an App that allows you to approve and sign from your smartphone. The digital signature gives legal value to your documents and can be used on any type of file.

## **SIGN AND APPROVE WITH YOUR SMARTPHONE**

When you are involved in a signature and approval process, Valid Sign sends you an email or a push notification: after viewing the documents, sign and approve them with your smartphone or browser. Valid Sign **increases your efficiency**: with a simple action you can put more signatures at the same time, wherever you are.

**Features** Remote Digital Signature / Editing PDF on AcroFields form / CAAdES, PAdES, XAdES support / visible signature on PDF files / multiple signature / time stamp / Virtual Private Server for top level privacy / SaaS mode / electronic seal

**Are you a big organization?** Intesi Group can manage enterprise project for custom implementation in cloud or on premise.
